HELPING OTHERS

ABOUT ME

Passionate Software Engineer with expertise in Angular, TypeScript, React / Next JS and modern front-end tools like Tailwind, Prime NG, Material, Bootstrap, and responsive design. Experienced in building scalable web apps, integrating RESTful APIs, and contributing to full-stack projects with C#, Node.js, and SQL. Familiar with DevOps pipelines using Azure, Jenkins and Docker. Committed to clean code, continuous learning, and collaborative development.

EXPERIENCE

**1DATAGROUP
TECHNOLOGIES**

Oct 2025 - Now

SINGULAR LOGIC S.A

Apr 2023 - Oct 2025

COGNITY A.E

Feb 2022 - Apr 2023

EDUCATION

UNI OF WEST ATTICA

Oct 2015 - Apr 2021

ANGULAR DEVELOPER / FULL STACK

Contributed to the redesign and modernization of a large-scale eBanking platform, migrating legacy AngularJS functionality to the latest Angular ecosystem. Implemented complex banking workflows across payments, transfers, approvals, validations, and multi-step transactional journeys. Translated Figma designs into responsive, clean Angular interfaces, supporting rebranding, design consistency, and seamless user experience across devices. Worked on .NET BFF integrations, unit testing, Azure DevOps pipelines, releases, debugging, refactoring, and maintainable enterprise delivery.

ANGULAR DEVELOPER / DEVOPS ENGINEER

Developed scalable Angular applications across travel authorization, ticketing, eCommerce, government, ERP, and fuel management platforms. Built reusable frontend solutions using custom Angular components, templated flows, integrated APIs, and dynamic user interactions. Led the EuroElections 2024 upgrade from Angular 7 to Angular 18 using Angular Signals, improving performance and maintainability. Refactored ERP and fuel station systems using NgRx, responsive design, Jenkins, Docker, and CI/CD practices.

ANGULAR DEVELOPER / TEAM LEADER

Refactored a legacy ASPX-based banking system into a modern Angular UI, improving maintainability, usability, and frontend structure. Led development and maintenance of an Angular-based insurance sales platform, supporting secure operations, deployments, and production stability. Collaborated with stakeholders and backend teams to capture requirements, align implementation details, and ensure seamless system integration. Conducted code reviews, enforced frontend best practices, maintained code quality, and mentored junior developers.

**INTEGRATED MSC, DEPARTMENT OF ELECTRICAL AND
ELECTRONICS ENGINEERING**

Diploma Thesis: "Develop a web app for online project management".

Internship: Calibrator Assistant at Yphd (Haf) - During Military Service.

CERTIFICATIONS

UDEMY

Dec 2024 - Mar 2025

GITHUB ACTIONS - THE COMPLETE GUIDE

Automation · Custom GitHub Actions · Pipeline Development and Security.

JENKINS, FROM ZERO TO HERO

Jenkins · CI/CD Pipelines · DevOps · Docker · Ansible · Maven.

DOCKER & KUBERNETES: THE PRACTICAL GUIDE

Docker (images, compose, networking), Containerization, Kubernetes.

BITDEGREE

Oct 2021 - Jun 2022

FRONT-END ACADEMY (960 HRS)

Figma, HTML/CSS, responsive design, JavaScript (ES6), popular frameworks and libraries, SQL/NoSQL.

FREECODECAMP

Jan 2022 - May 2022

JAVASCRIPT ALGORITHMS AND DATA STRUCTURES

ES6, OOP, Functional Programming.

RESPONSIVE WEB DESIGN

HTML/CSS, Flexbox, Grid, Accessibility.

REGENERATION

Oct 2021 - Dec 2021

ACADEMY ON CLOUD TOOLS & TECHNOLOGY (240 HRS)

Backend C# and Rest API fundamentals.

Azure and Cloud tools fundamentals.

CODE + CREATE (GFOSS)

Mar 2020 - May 2020

WEB DEV COURSE (104 HRS)

HTML, CSS, JavaScript, Bootstrap and Angular.

Awarded as Most **Helpful**, **Committed**, and **Driven**.
